

Press Release

Aura supplies street lighting to Karlskrona municipality

The Aura lighting company, with development, production and customer service in Karlskrona, has been awarded the task of supplying Long Life light sources for street lighting by Karlskrona municipality. The lamps have a guaranteed service life of 12 years and generally offer savings in maintenance costs that are greater than the actual investment in light sources, while the environmental impact is also minimised.

Aura supplies Long Life light sources that last at least three times as long as standard products on the market. This saves both money and the environment, since only a third of all potential light source replacements are needed. The environmental impact is reduced by two thirds when it comes to production, transportation, and waste, etc.

The future-oriented environmental work has a high priority in Karlskrona municipality, and the municipality is a member of SEkom – the association of Swedish eco-municipalities. They have chosen to purchase the Long Life version of Aura’s high-pressure sodium lamps for use in street lighting. The lamps have a guaranteed service life of 12 years, which means that the maintenance costs and environmental impact are both reduced dramatically. The replacement costs for lighting in very highly-trafficked areas are high.

“It is great that Karlskrona municipality, which is very environmentally aware, has chosen our Aura Sodinette Long Life for street lighting, particularly as our background is in Karlskrona,” comments Martin Malmros, CEO and Group Director Aura Light International AB.

Aura supplies Long Life light sources that are guaranteed to last three times longer than standard products on the market, saving both money and the environment. The foundations for Aura were already laid in 1930 under the name Lumalampan and Long Life fluorescent lamps have been produced since 1980. The Head Office is located in Stockholm, whereas development, production and customer service can be found in Karlskrona. In addition, the Group has subsidiaries in Denmark, the United Kingdom, Finland, France, Italy, the Netherlands, Norway, Spain and Germany, and sells light sources all over the world. Customers are primarily found in industry and the public sector. Aura has approximately 200 employees and a turnover of approximately EUR 50 million. You can read more at www.auralight.com.
