

New lamps light up a  
**hidden treasure**

**AURA**  
THE ORIGINAL LONG LIFE LIGHT

# A world first!

## Energy saving fluorescent lamps in Long Life version

For the first time in history, there is a T8 fluorescent lamp in Long Life that saves up to 12 percent in energy consumption. And your maintenance is reduced by two thirds. No other supplier can provide you with a combined energy saving and Long Life solution that lasts three times longer than standard products. Did you know that lighting constitutes about 20 percent of your energy consumption?

- Save up to 12% in energy consumption
- Reduce the CO<sub>2</sub> emissions
- Use your existing luminaires
- Reduce your maintenance by two thirds

AURA T8 ECO SAVER LONG LIFE

Wattages	Energy savings	Lifetime	
		12h-switching cycle (11h on, 1h off)	
		Magnetic ballast	Electronic ballast
16 W (suitable for 18 W luminaires)	11%	43,000 h	60,000 h
32 W (suitable for 36 W luminaires)	11%		
51 W (suitable for 58 W luminaires)	12%		
<b>Application areas:</b>	General industrial premises, public buildings, offices schools, hospitals, shops, etc.		

# Use your existing luminaires

There are great possibilities to save energy on the lighting in your premises. And you can do it in existing luminaires designed for T8 lamps. Switching to Aura T8 Eco Saver Long Life is easy and no additional investments are needed. You quickly start saving both energy and maintenance. This unique lamp is a suitable solution for customers who want to reduce energy consumption and maintenance costs in a simple way.

---

## For those who are budding environmental heroes

You can save a great deal of money, but you also reduce your carbon footprint considerably. In this way, you contribute to a better environment, while reducing costs. And thanks to the Long Life qualities of T8 Eco Saver only a third as much raw material, energy for production, packaging and transportation is needed.

*Why wait for tomorrow? Go with Aura - the original Long Life light! Get in touch with us today to reveal your hidden treasures!*

*We have a cooperation with the Climate Care organisation to make our products CO<sub>2</sub>-neutral.*

*Aura has a symbol for Long Life. The figure in the symbol shows how many times longer the product lasts compared to standard light sources. If you select light sources with the Aura symbol, you maximise service life and minimise the impact on the environment.*
