

REFERENCE

EuroAirport Basel Mulhouse Freiburg, France

Project: EuroAirport Basel Mulhouse Freiburg
Customer: EuroAirport (France)
Product: Compact fluorescent lamps - Aura UNIQUE-L Long Life, Aura UNIQUE-D Long Life.
Sector: Airports/infrastructure
City, country: Saint Louis, France
Customer contact: Jean-Marc Kuster, Electrics Department

Background

Thanks to its trinational location, EuroAirport Basel Mulhouse Freiburg is today a symbol of international cooperation between France, Switzerland and Germany.

In 2007, the EuroAirport welcomed over 4.5 million passengers through its doors. Its scheduled flights network directly serves 62 airports in around 30 different countries. A total of around twenty companies operate approximately 70 scheduled flights per day.

Easy to access

Jean-Marc Kuster tells us that they have chosen Aura lamps for two reasons:

"The first is due to the access to lighting fixtures. Inside the airport, the ceilings are high up and the lamps that are installed are often difficult to access. By choosing Aura Long Life compact fluorescent lamps, we have been able to reduce the frequency of lamp replacement by 66%, at the same time as improving passenger comfort. This also results in a significant reduction in maintenance costs of €12.25 (ex. VAT) per lamp, says Jean-Marc Kuster".

"Second, we chose Aura lamps for environmental reasons. In fact, this move is in line with our environmental policy. We are thus reducing our carbon footprint as well as cutting by two thirds the number of lamps recycled. Based on 1000 installed Aura compact fluorescent lamps, we save 660 kg of CO₂ associated with transporting the lamps and 360 kg associated with waste, lamp production and packaging, says Jean-Marc Kuster".

"Aura lamps have a life of at least 5 years, therefore we can achieve significant cost savings at the same time as reducing the environmental impact of our lighting solutions."

About Aura

Aura supplies Long Life light sources and solutions. With a lifetime that is at least three times longer, you can reduce your maintenance costs and environmental impact by a third. With our T8 Eco Saver and Eco solutions, you can also reduce your energy consumption dramatically, thus reducing your energy costs and carbon footprint further.
