

CASE STUDY

Neste Oil, Finland

A standard Neste Oil service station is open 24 hours a day, 365 days a year. There is a lot of outdoor lighting needed in such a station e.g. in the price signs or the ceiling. On average a station has 60 lamps that have to endure rain, snow, cold and heat. These circumstances require products that can handle all kinds of strains and are nevertheless able to hold a constant light level.

Saves two out of three replacements

In order to save money as well as avoid unnecessary close of business the maintenance should be reduced to a minimum – therefore the Aura Eco Solution, which provides a virtually maintenance free solution is the perfect answer. Neste Oil saves two out three replacements in average compared to a standard solution.

Large savings with Aura Eco Lighting Solution for Signage

In a petrol station with 60 lighting points operated by the Aura Eco Solution for outdoor signage it is possible to save approximately €550 per year. And the payback of the investment is less than two years.

About Aura

Aura supplies Long Life light sources and solutions. With a lifetime that is at least three times longer, you can reduce your maintenance costs and environmental impact by a third. With our T8 Eco Saver and Eco solutions, you can also reduce your energy consumption dramatically, thus reducing your energy costs and carbon footprint further.
