

# CASE STUDY

SCA, Värnamo, Sweden

SCA in Värnamo manufactures packaging for the food industry. The company's customers expect quality certification and demand complete safety in the production environment.

### **Safety requires Aura PROTECTOR Long Life**

Due to safety requirements, SCA uses the strong and shatterproof Aura PROTECTOR Long Life fluorescent lamps. "We have invested in Aura Protector throughout the factory, for safety reasons," says SCA Electrical Manager Bo Josefsson.

### **Avoid stoppages with Aura Long Life**

"For some time now I have purchased Aura Long Life fluorescent lamps because they burn for at least three to four years. It pays to install them, as we have a complex environment for replacing lamps in. We cannot replace lamps when the line is in operation, so we have to shut down the machines," explains Bo.
