

CASE STUDY

Atrium Ljungberg - Farsta Centrum

Atrium Ljungberg is one of Sweden's largest listed real estate companies, with a focus on owning, developing and managing business and office properties in particular.

One of Atrium Ljungberg's properties is Farsta Centrum - one of Stockholm's largest shopping centres. That's where Stefan Hedlund works as a Technical Administrator, with responsibility for an area of 100,000 m².

Reliable deliveries with Aura Light

Farsta Centrum uses Aura Light's light sources, mostly in public spaces, everywhere from toilets and open spaces to garages, as well as in offices and stores.

"There are around 50,000 light fittings in our premises, so we use a good mix of Aura Light's light sources," explains Stefan.

Atrium Ljungberg does not keep light sources in stock, and so quick deliveries are incredibly important, which is one of the reasons why they chose Aura Light as a supplier.

"Deliveries from Aura Light always work well! It is a huge benefit that Aura Light is so reliable and quick. Not needing to stock light sources ensures huge cost savings on our part," says Stefan.

Aura Long Life for the environment

Another reason for Atrium Ljungberg choosing Aura Light is their desire, as part of their environmental work, to contribute to long-term sustainable development, which means choosing suppliers who work with a focus on the environment.

"We work with the future in mind and aim to minimise the number of light source replacements, which is why we use Aura Long Life, where possible. We know that Aura Light is at the forefront when it comes to saving energy," concludes Stefan.

About Aura

Aura supplies Long Life light sources and solutions. With a lifetime that is at least three times longer, you can reduce your maintenance costs and environmental impact by a third. With our T8 ECO SAVER and Eco Lighting Solutions, you can also reduce your energy consumption dramatically, thus reducing your energy costs and carbon footprint further.
