

# CASE STUDY

Falu Hospital, Sweden

Falu Hospital, which dates back to 1695 and is considered to be the country's first emergency treatment hospital is today a county hospital, a district hospital and a centre for Dalarna's specialist healthcare. Falu Hospital is the largest workplace in Dalarna with around 3,000 employees. Here there are some 500 beds, divided over 17 clinics and a range of special wards.

## Products that deliver what they promise

– Aura Light products give what they promise: a service life that allows for major savings. The fluorescent lamps are undeniably as good as they are claimed to be. Otherwise we would have never continued to buy them. As I now know what service life I can count on, I can implement cost efficient group replacements. In addition, it is better to have one lamp as opposed to three when it is time to collect everything for recycling...

## Good service and high delivery security

– Aura Light's service is perfect and the delivery reliability is very high. Aura Light has not had a lot of competition, but nevertheless always show that they measure up. We install Aura Long Life fluorescent lamps just about everywhere possible in the hospital.
