

CASE STUDY

Kampis Keskus Bus terminal, Finland

Kampis Keskus is comprised of a range of different premises; shopping centres, office premises, housing, multi-storey car parks and goods yards, as well as two terminals for Esbo's local services, and one terminal for long-distance services. Aura Long Life lamps are installed throughout and provide lighting for the local inhabitants at all hours.

Lighting around the clock

Lasse Wikholm on Kampis Kaskus is happy with the choice of Aura Long life and tells us more:

"It all began with the need we had for lighting for the bus terminal, where light was required around the clock. This made it difficult finding time for replacements. When we learned about Aura Long Life and its significantly longer service life when compared to standard light sources, the choice was easy", says Lasse Wikholm.

Aura Long Life became the obvious alternative

"As regards to the needs we had; light around the clock and a long life, Aura Light is the obvious alternative. There is no other supplier in Finland that can satisfy our needs in the same way", Lasse Wikholm concludes.

About Aura

Aura supplies Long Life light sources and solutions. With a lifetime that is at least three times longer, you can reduce your maintenance costs and environmental impact by a third. With our T8 Eco Saver and Eco Lighting Solutions, you can also reduce your energy consumption dramatically, thus reducing your energy costs and carbon footprint further.
