

# CASE STUDY

SVPH, Sweden

SVPH, Sällskapet Vänner till Pauvres Honteux (Society of Friends of Pauvres Honteux), is a non-profit making association that offers rented apartments to healthy pensioners. SVPH also has guest-houses, nursing homes and sheltered housing. Now SVPH has decided to replace all of its light bulbs to low energy lamps wherever it is possible in their buildings. This involves a total of 2,100 light sources.

## Cost reduction with compact fluorescent lamps

Arne Svärth at SVPH tells what they base their decision on: "The primary reason for deciding to replace all of our light bulbs with low energy lamps was that our calculations showed that we could make savings of around 300,000 kronor per year. Just by changing light bulbs - who can say no to that?"

## Wide product range and high delivery reliability

SVPH has worked together with Aura for a long time. "SVPH has been working with Aura Light for a long time. We have a well-established relationship that works very well. We are particularly pleased with Aura Light's range and delivery reliability which has always run very smoothly", says Arne.
