

# Tunable White control devices

Touch panel, Dry contact interface or Bluetooth interface

Aura Lights Tunable white products are delivered with DALI DT8 compatibility, to allow for an easy integration to a wide range of different control systems. DALI is a well-known standard followed by the majority of the suppliers of lighting control systems, you can choose from simple stand-alone systems to more complex BMS systems. As long as it's compatible with DALI and DALI DT8, Aura Lights tunable white products will function with your system of choice.

To make it even easier, we have picked three different types of stand-alone interfaces which you can use to fully control the colour temperature of the luminaires along with the light intensity.

- Control your color temperature and light intensity
- Easy to install
- Plug-n-play – no programming is needed
- Control up to 64 tunable white luminaires with one device
- Immediate response
- Stylish and easy to understand

**TOUCH PANEL:** With the DALI touch panel you can attach a stylish panel to your wall, and control the light intensity together with the colour temperature. The panel is connected to and powered via the DALI cables. No programming is necessary, just connect the panel to the DALI cables and you're ready to go.

Articel number: Touch panel 9417002.

**BLUETOOTH INTERFACE:** Do you want to allow the users to control the lighting via their smartphone? Just connect the control module on the DALI cables, download the app from iTunes/Android store, and start controlling your luminaries via the Bluetooth-connection. The App offers the same functionalities as the touch panel.

Articel number: Bluetooth 9417004.

Please note that all control modules are powered via the DALI cables why a DALI power supply might be needed. Aura Light offers two types of standard DALI Power supplies.

Articel number: DALI Power Supply for DIN rail 9417005.

Articel number: DALI Power Supply 9417006.
