## Installation guide – UltiLED PRO

This guide explains the steps necessary to install UltiLED PRO inside a luminaire and ensure optimal performance. The guide is only for reference and is intended for qualified electricians or lighting technicians.

## Installation 6 steps:

1) Make sure that the right type of driver is within the luminaire. (A SELV driver is recommended. Should a non-SELV driver be used that still meets the requirements of the tube, power to the luminaire should be disconnected prior to installing or changing the UltiLED tube if the UoutMax (no load voltage) is equal to or greater than 400V.)

- a) 18W tube needs 700mA and 26,1VDC
- b) 28W tube needs 700mA and 40,6VDC
- c) 34W tube needs 700mA and 49,3VDC
- 2) Unpack the UltiLED PRO tube.
- a) Carefully examine the product
- b) Do not use the product if it's damaged

3) Make sure that the active side (metal pin side) is connected to the active side within the luminaire. See picture below.

a)The UltiLED PRO tube is not bipolar so the LED+ and LED- side must coincide with diagram below

|   | LED +                 |  |  |  |  |  |
|---|-----------------------|--|--|--|--|--|
| UltiLED PRO is not a retrofit LED lamp for T8 or T5 replacement application. An external LED driver   | L LED<br>N Driver     |  |  |  |  |  |
| complying for European safety & performance<br>norms should be used. All light fitting manufacturers<br>should conform to the international standards | Circuit diagram LED - |  |  |  |  |  |
| IEC 60598-luminaires  |                       |  |  |  |  |  |
|   | UltiLED               |  |  |  |  |  |

4) Make sure that the UltiLED PRO is turned into the luminaire so that the light output is directed the desired way.5) Reconnect power to the luminaire and turn it on.

### Additional information

- because of external power supply, tubes can only be used in therefore suitable luminaires.

- installation instructions and warnings are provided with the products
- to avoid dangerous situation for end user, the tube is double/re-inforced insulated from live parts.
- LED tube is recommended to be used with certified SELV LED driver

### Limitation of use

Due to dimension of the and cap, the LED tubes can only be used with lampholders which are provided with rotor in the middle.
